PLEASE NOTE:

The water may show discoloration for a few hours after flushing. Do not consume or use the water for cooking until the water clears up. The water can be used for bathing and dishes. The brown color is iron from the bottom of the water lines. However, the iron may stain white clothes. We do not recommend washing white clothing during the time your area of town will be flushed. If whites become discolored during wash cycle, call the water dept to get a special detergent that will remove the iron BEFORE you dry the whites.

ALSO: Customers may experience low pressure when Water Department is flushing,

If you have any questions, please call City Hall at 386-3111

(Schedule subject to weather permitting)
